

Example resources and cost indication list

Here is a list of some items that are useful for your Community Composting Hub. We don't endorse particular brands, and leave it to you to find the option that best works for you. Our tutors are available to assist you with further advice and answer any questions on this.

Item	Why you might need this?	Examples of options	Estimated Cost (EUR)
Scales	These would be used to weigh food scraps prior to adding them to your compost.	<p>Plug in Digital Large-Scale LCD 150kg</p> <p>Portable Hanging Scale - for smaller weights - has a hook that can hang from a tree or similar – Variety here</p>	<p>€ 235</p> <p>€ 8 - € 15</p>
Long handled garden fork	This is a useful tool for moving compost from one location to another i.e., moving compost into another bay.		€ 5 - € 50
5 Kg worms	Worm Farming Option	Partial list of worm suppliers	€ 30 - € 50
Thermometer	This is only needed for Hot composting systems if you want to check that your heap is hitting the correct temperature.	Premium Stainless Steel Compost Soil Thermometer 50cm Length	€ 50

<p>DIY composting systems</p>	<p>Depending on where you are in your journey with composting, it's not necessary to always purchase 'New' systems. A good Do It Yourself Project can work just as well if not better as you can design it to your own needs, at the same time as utilising other resources.</p>	<p>Make your own compost bin</p> <p>Make your own worm farm</p> <p>Make your own Bokashi bins</p>	
<p>Eco Enzyme liquid</p>	<p>Home-made Eco Enzyme can be used in place of Bokashi zing, saving money.</p>	<p>Make your own Eco Enzyme (recipe here)</p>
